Scenario:

You are a nurse caring for an elderly patient who has recently undergone surgery. Write a referral letter to the patient's general practitioner (GP) informing them about the patient's condition, recent assessments, and recommendations for ongoing care.

Sample Answer:

Dear Dr. Thompson,

I am writing to inform you about Mr. John Carter, a 78-year-old patient under my care following his recent hip replacement surgery. Mr. Carter was admitted to our facility on March 15th, and the procedure was successfully performed without complications.

Since surgery, Mr. Carter has been monitored closely. Postoperative assessments indicate adequate pain control, and he is mobilizing with assistance. His vital signs remain stable, and there are no signs of infection or other complications. He has a history of hypertension and type 2 diabetes, both of which are well-managed.

During his stay, we encouraged early mobilization and provided wound care. The surgical site is healing well, with no signs of redness, swelling, or discharge. We have also begun patient education on activity restrictions and wound care at home.

For ongoing recovery, I recommend continued physiotherapy to improve mobility and strength. Please monitor his blood pressure and blood sugar levels regularly and review his medication regimen as needed. I will update you on any further developments.
